

Precision Repetition

3D Printed Trimless Screen + Laser Cut metal trim face

Clarté Lighting level plane and trimless recessed parts are fabricated to aerospace standards of geometric dimensioning and tolerancing (GD&T) from part to part.

3D printed screens combined with a laser cut metal trim face plate creates fabrication perfection.

Multiple ½" regress trimless or level plane Clarté Lighting fixtures installed in the same space side by side shows the precision of Clarté Lighting's fabrication process.
