

4 Easy Steps. No Rewiring Required.

Just like changing a burned out lamp, easily upgrade ANY 4" MR16 fixture to a NEW Clarté Lighting 3" LED with a 7 year warranty!

Step 1 Identify Existing Fixture Housing

a

Halo 1499
Juno TC 2
Any similar style fixture...

4" Straight/Round
Sided Housing

b

Iris
Lightolier
Lucifer
Element
Kurt Versen
Prescolite
Any similar style fixture...

4" Architectural
Square/Rectangle Housing

Step 2 Select a Desired Fixture

RR3-392-PAR16
Shallow Recessed

RR3-397-PAR16
Pinhole

RR3-398-PAR16
Semi-Recessed

RR3-391-PAR16
Slot Recessed

RR3-393-PAR16
Deep Recessed

Step 3 Select the Correct Trim Type

a

(tc) Tension Clips

b

(sc) Spring Clips

Step 4 Plug in Clarté Whip into MR16 Socket

Add RET to any 3" trim to specify Retrofit Version.
Retrofit Version = bipin plug and LED driver inside Clarté PAR16 scale heat sink.

Clarté Retrofit Bipin Plug

MR16 Fixture Socket

Remove Heat
Deflection Plate

Clarté Lighting new architectural LED trim solution is designed to operate from an existing 12V magnetic AC step down transformer.

If the existing 12V AC step down is **ELECTRONIC (ELV)**, Clarté Lighting's solution will not work properly.

The existing ELV transformer must be replaced with a 12V magnetic step down transformer to operate the new Clarté Lighting architectural LED trim properly.
